

PANTHEON®

Workspace Plans

Elevate Your WebOps Experience

Unlock the best Pantheon experience with our Workspace Plans. Whether you're a freelance developer or an enterprise WebOps team, we have what you need to make a big impact.

Important Note: Our transparent pricing model consists of two parts: Workspace Plans for your organization and Site Plans for each website. You will require a Workspace Plan for your team to start building on Pantheon and a Site Plan for each website to go live. We have four types of Workspace Plans to match your needs.

SILVER

Best for Developers

Start your journey with Pantheon's Silver Workspace. With our expertly configured hosting environment and developer tools, you can quickly build new WordPress and Drupal sites. Jumpstart your projects with the freedom to explore and innovate—no strings attached.

GOLD

Best for Small Teams

The Gold Workspace offers advanced tools and workflows for small teams looking to establish a foundation for long-term success. Unlock productivity benefits with tools like [Multidev](#) to facilitate easy collaboration across multiple sites and global brands. Elevate website performance, stability, and security with automation tools for routine maintenance tasks

PLATINUM & DIAMOND

Best for Enterprise Teams

Make Pantheon your strategic business partner with a Platinum or Diamond Workspace Plan. Whether you're part of a big and complex organization, manage mission-critical sites, or both, our Platinum and Diamond Workspace Plans offer next-generation governance and support with experts committed to your success.

Building upon the features of Silver and Gold, the Platinum and Diamond Plans provide:

- Hosting for high-traffic sites
- Capacity to support multiple teams
- Overage protection
- Image Optimization
- Web Application Firewall (WAF)
- Decoupled architecture with Next JS support
- Account hierarchy
- Priority support
- Emergency on-call support
- Dedicated account manager
